X or O
2011

This work functions as a game. It can be played on a wall. It is suitable for two individual players or two groups of players. To play, print all the pages of the PDF. One player gets the 8 Xs, the other gets the 8 Os. Please decide who will start the game. The players can now alternate sticking an X or an O to the wall. The pages can correspond diagonally, horizontally or vertically – just make sure to respect the quadratic grid and have the side of the pages parallel to each other on the wall (see illustration below). The first player to achieve four Xs or Os in a line, wins.

Take a picture of the installed work and send it to: office@curating.org
The photos of the installations will be collected and published.
